Projects

1. Formulas-for-University

Info

In this project I used the library React JS and also this project is created with Tajik language. This project is created for solving some mathematical formulas (the volume of ice), and the mathematical formulas are given. Only we need to add the number and click the submit button.

Demo

https://formula-for-volume-of-ice.vercel.app/

Code

https://github.com/olimyuldoshev2003/Formulas-for-University

2. Hospital Tj

Info

This project is created for showing the Hospitals, their categories, scedule and so on. With this project you can find your favorite Hospital and also about that Hospital and also its category and its services. This project is created with Russian language.

Demo

https://hospital-tj.vercel.app/

Code

https://github.com/olimyuldoshev2003/hospital-tj
